- Beach/sand
- Rock shelf
- Minor vegetation
- Major vegetation
- 1m contour interval (source: GIS)
- Water HAT level (highest astronomical tide)

FISHERMANS BEACH

An existing path - to be assessed and connected to new on-grade track

1. ON-GROUND PATH

Generally of a consistent width and grade, utilising the existing path where possible and avoiding vegetation to preserve a natural walk that is semi-shaded along the length of Fishermans Beach.

2. CONNECTION TO BOARDWALK

A flush connection to an elevated structure to allow significantly more ease of access connection to Shelving Beach
