

- Proposed track
- Existing ungraded path
- Beach/sand
- Rock shelf
- Major vegetation
- 1m contour interval (source: GIS)
- Water HAT level (highest astronomical tide)

MONKEY BEACH

Sections of elevated boardwalk that focuses on universal access to provide a path to a typically hard to reach location.

1. PROPOSED SEGMENTS OF STRUCTURE

Small segments of boardwalk with stairs that bridge gaps and hard-to-cross terrain that allow for a much easier journey along this segment of headland

2. NATURAL LOOKOUT

Existing elevated rock shelf that lends nicely to a natural lookout along smooth rock.

3. HEADLAND TO MONKEY BEACH

Continuation with larger segments of boardwalk to bridge larger gaps through rougher terrain
